Description:

This new edition of a popular tailoring guide is double in size, adds color photography, and features new and speedier techniques that embrace fusible interfacing and an all-machine-sewn lining technique used in ready-to-wear. More than 700 photos and illustrations accompany instructions detailed enough to allow a beginner who has never taken a sewing class to glide through chapters on patterns and fabrics, proper cutting and marking, methods for pressing and seam finishing, and how-tos that ensure a perfect fit. The choice and tailoring of collars, buttonholes, pockets, and mitered back vents are shown to create individuality and flair, while special sections provide information about stripes and plaids, mens jackets, finishing touches, and helpful tools and notions.

Like its companion Palmer-Plesch real people books on general fitting and pants fitting, this does not confine itself to the perfect size 6 figure. The photos are inspirational for that alone! More importantly, it gives valuable pointers in how to work with the bodies most of us actually have (versus the runway models bodies the pattern manufacturers have designed for). I own several books on tailoring, and I would rate this one of the very best in explaining how to do it. Making a tailored jacket is an intimidating project; with this book, the mystery is reduced. The photographs are excellent and the instructions concise and easily understood. Anyone making a tailored jacket for a woman of just about any shape or size would find it helpful--and much of the information would apply to making a comparable garment for a man.
